

# Value-less Plight

Sunday Nail © 2018

## Why ...

am I to be like this  
storming here and there and in despair rich  
when in this world, of abundantly clear evidence,  
I am to be calling on my own conscience ...

about the way  
the preceding years have dealt us  
to a point of utter uselessness  
discarding the benefit of hindsight  
and left us all in one almighty plight.

## Destruction on the rise

that which is of course left.  
And no way more than of the earth  
even touching as far as atmospheric life.

**No** way out. **No** way clear.

But of this earth  
denial has damaged more ...  
more than is possible to retrieve  
let alone animal, insects, seas,  
species unbelievable -  
not to mention human life.

Sacrificial, suicidal,  
wars extreme  
continuing on land  
as well the oceans  
once supreme.

Radiated atmosphere.  
Radiated human beings.  
Radiated particles.  
Radiated animals.

Whatever causes a bomb,  
atomic, to be dropped,  
drones flying over top?

**What ...**

**is to become of us,  
a human being species,  
the whole damn lot?**

## The weather is in a state

one day up another late.  
Clouds all dark, ominous appear  
then without any rain disappear.

Tornados on the rise.  
Hurricanes no longer a surprise.  
Floods and tides do rise  
droughts and suffering never ending.

## Life

in all parts it seems  
suffering some  
in forms as disease.

But whatever happened  
when a minor dies ...  
life goes on in the West  
as no surprise?

Weather wise - no surprise the **West denies.**

**B**attle hardy ... **but not** my mental state.

**B**attles raging  
every land and sea mass.

**W**hat a debacle.

Will it cause some form of life support  
when on return their mental state  
leads them to a path – no way to sort it all out?

I am aware,  
'battle hardy' is the way forward  
but that is a voice,  
from a desk or higher ground,  
away from battle grounds.

God, did once say,

man a mouse  
when in battle he (or her)  
does do and shout about  
what it was that they did prefer  
before a signature  
them owned and bought without a care.

But solidly know that one is cared  
but far preferred if thought was there  
before the battle began –

and those bells sounded death ...  
perhaps to even everyone.

**T**he method of a life style  
leans toward  
a more peaceful enterprise.

**O**ne that has a **value** stamped  
right in front of every thought,  
word, action and life support.

**Some people ...**

are not able to think enough about who they are  
but more about what they wish and wanted for.

But in this world of troubling times  
best to believe  
one is better than ever thought before.

Because as the difficulties  
keep troubling more and more  
there is time to consider how best then to arise.

And think about saving more than just the earth  
but more about the value of those left to resurrect.

**The value ...**

*of your own life story has to matter.*

Not be disquieted in some small corner  
left to fester for the rotten parts  
and not retrieve the betterment and valuable parts.

## Life

is a constant  
no doubt about that.

## But ...

what is evident  
is a place to love  
and peace to keep.

Much has been handled very badly  
and we have had to suffer.  
But are we now prepared to value life,  
the learning that did and does now matter?

## Strength and Courage

are our story ...  
when addressed.

Strength and love,  
courage at our very best -  
to warn, keep and live with heart,  
to ensure love is at least  
the very and most precious of parts.

Someone **inside**, at times, does help us out.

**C**ourage comes  
in small and varied paths.

Some of those are difficult and rough.  
Some of them however  
provide a new form of love.

Something on that journey's path  
leads to think more about  
who we are and want to be  
in that of first and foremost,  
our behaviour endlessly -

What is of the best?  
What is beneficial and contains  
some form of love inspired,  
although rough and tough  
that very path's terrain?

However much we care about our life  
someone inside of us does at times help us out.

People laugh and consider thought a joke,  
but when it comes on down to it,  
thought as precious as words complete,  
thoughts as worth and ideas ideal  
these are what our betterment has for us,  
but often sealed.

**L**ife leads toward  
a much more beneficial enterprise.

**N**ot the *plight* the world is in ...

For that is far too horrific  
for an individual to sort out.  
But more for a community, socially,

*but too ...*

seriously identify the plight we are in  
and in how small each can and do provide  
a little of their human skill.

**L**ife ...

leads **us** toward an end.

Some people's life  
is very short and or thin.  
Others try as best they can  
but fail in being or doing  
what they hoped to achieve to star in.

But in all eventuality  
it is far more important  
to value everyone -

Everyone who lives on the earth.  
Every creature born as life to live.

**E**veryone ...

who has a heart to become engaged  
and live with conscience.  
And not ever let that decide  
what is being bad,  
but what is of benefit to survive.

**S**uffer **not** without a care  
to think more  
about in how to repair.

Suffer not and cause another harm  
because in them is a promise to learn.

**J**ustify nothing  
but to learn how to behave  
compassionately.

Then in time  
love is what is to eventually surround  
and no more cause catastrophes.

So love and fellowship  
are part of this greater resourceful plan  
toward healing each and everyone  
who is hurting and hating  
leaving no further space to creatively inspire.

And therefore now,  
in that Western atmosphere,  
nothing but nothing of love it is to be heard.

For those warring factors are well in place  
for the next and next development -  
to destroy our human race

**L**ove and fellowship toward healing everyone.
